

# COMP 2015 – Assignment 2

Due at the beginning of Lesson 6 to the Dropbox > 'Assignment 2' folder on D2L ([learn.bcit.ca](http://learn.bcit.ca))

Access to the dropbox folder for Assignment 2 will close at the beginning of Lesson 6, so make sure to have your assignment submitted before class starts.

## Submission

Write **one .js file** named **firstname-lastname-assignment2.js** and submit that file to the Assignment 2 dropbox on D2L. For example, if your name is Chris Harris, your file must be called **chris-harris-assignment2.js**

Only submit your .js file, **do not include any HTML or images**.

## Instructions

In Assignment 2, you will be implementing the `addUserFunction()` function that was provided for you in Assignment 1, as well as replacing the hard-coded messages with messages retrieved from a remote server.

An html file, css file, and images have been provided for you, as well as a JavaScript file called **firstname-lastname-assignment2.js**. This JavaScript file includes a **complete solution to Assignment 1**, as well as **instructions on how to complete the two parts of the assignment**. Rename this file using your own **firstname** and **lastname**, and submit it.
